

SECOND  NATURE®  
HYDRAULIC MULCHES

To Us, Effective Erosion Control  
Is Second Nature®.

central  fiber

Dependable. Smart. Naturally.

No matter what kind of erosion control project you are facing, you'll find the perfect mulch for the job in our complete line of hydroseeding products.

**Second Nature®  
SprayMatt® Bonded Fiber Matrix**

A safe and economical erosion control substitute for traditional mats even on the steepest slopes. Typical application rate of 3000-4500 pounds per acre.

**Second Nature®  
Wood Fiber Mulch**

Virgin hardwood chips make 100% Wood Fiber the finest, most contaminant-free mulch available anywhere today. It offers excellent consistency, coverage and color retention. Typical application rate of 1500-2500 pounds per acre.

**Second Nature®  
Wood Fiber Mulch Plus**

Same great product as our Wood Fiber Mulch, with 3% guar based tackifier as an added bonus for improved soil contact & a smoother application. Typical application rate of 1500-2500 pounds per acre.

**Second Nature®  
Wood Fiber Blend Mulch**

A combination of superior, all-natural wood fiber & the industries leading paper fiber mulch. Blend offers all the attributes of both products in one easy-to-handle package. Typical application rate of 1500-2500 pounds per acre.

**Second Nature®  
Wood Fiber Blend Mulch Plus**

Same great product as our Wood Fiber Blend Mulch, with 3% guar based tackifier as an added bonus for improved soil contact and a smoother application. Typical application rate of 1500-2500 pounds per acre.

**Second Nature®  
Cellulose Fiber Mulch**

Manufactured from recycled paper, 100% Cellulose Fiber Mulch is the professional choice for hydroseeding. Typical application rate of 1500-2500 pounds per acre.

**Second Nature®  
Cellulose Fiber Mulch Plus**

Same great product as our Cellulose Fiber Mulch, with 3% guar based tackifier as an added bonus for improved soil contact and a smoother application. Typical application rate of 1500-2500 pounds per acre.

**Second Nature®  
Straw Tack Mulch**

Environmentally safe and biodegradable, Straw Tack nails down vegetative mulch for a clean, cost-effective overspray. It is widely used in DOT seeding projects. Typical application rate of 750 pounds per acre.

**Second Nature®  
Easy Mix® Jet Apply Mulch**

A less densely packaged Paper Fiber Mulch designed especially for jet agitation machines. Easy Mix® provides rapid dispersion and quick application. Typical application rate of 1500-2500 pounds per acre.
