

TAC-L

rapid

TAC-L Hydroseeding Tackifier and Mulch Binder

STEP # THREE of the **rapid transit** Program

USE: **TAC-L** is a multi-purpose tacking agent, used as a hydroseeding tackifier, a mulch binder, or a light dust control product. Add **TAC-L** to your hydroseeding tank when agitator is operating and tank is half full.

CHARACTERISTICS: **TAC-L** is made up of highly adhesive polymers and minerals. It lubricates slurry components, produces stable particulate dispersions, and provides adhesion in binding and granulating applications. It is very water soluble, and is many times more slippery than guar. **TAC-L** is environmentally safe, containing less than 1% non-active contaminants, and is E.P.A. exempt. **TAC-L** is completely biodegradable.

BENEFITS:

- ❖ **TAC-L's** slipperiness makes it highly compatible with all hydroseeding slurries, promoting the flowability and even dispersion of seeds and particulates. It also greatly reduces the likeliness of any clogging.
- ❖ **TAC-L's** adhesive properties stabilize mulch, seed, and soil particles, thus protecting against erosion and assisting germination. It also retains water and, combined with the water-retention capacity of **Liquid Lime Plus**, further aiding seed and seedling performance.
- ❖ **TAC-L** is convenient to handle and dispose. Packaged in zip-lock plastic bags sealed inside of foil bags, it is protected from water contamination while stored. The contents are easily dispensed into tanks, reducing the risk of accident-causing spills. And the bags can be easily disposed into one trash bag or box at the application site. *(The trash accumulated after over 250 acres of application can be disposed of in a single standard 30-gallon-size storage bag.)*
- ❖ **TAC-L** is also space-efficient. It is packed into 25-unit containers or into gaylord boxes—the *space taken by a single pallet can hold enough TAC-L for one thousand acres of application.*
- ❖ **TAC-L** can also be used to tack heavy wood mulches or straw applications.
- ❖ Its capacity for soil surface stabilization makes it an attractive product for use as a dust-control agent in non-traffic areas.
- ❖ **TAC-L** is available in *three pre-measured sizes* for your convenience. They include a 1-Acre size, a ¼-Acre size, and a size for tank capacities of 300 gallons or less. There is no need to handle the product, simply drop the water-soluble bag into the tank and **fire away!**

APPLICATION:

Dust Control: use one bag (2.03 pounds) **TAC-L** per acre.

Tacking: general slurries including seed and paper mulch, use one bag per acre. (on slopes in excess of 30°, use two bags per acre.)

Wood Bark Binding: for materials other than cellulose (wood or paper) mulch, use two bags per Acre.
